

Erasmus+

INTERNATIONALIZATION, MODERNIZATION AND INNOVATIONS ARE PRIORITIES OF THE STRATEGY OF THE UNIVERSITY OF ENTREPRENEURSHIP AND LAW

University of Entrepreneurship and Law introduced and fully applies the ECTS credit system, which is one of the tools ensuring the transparency of the recognition process. University of Entrepreneurship and Law also introduced the issuance of a diploma supplement for the bachelor's and master's cycle of education.

International mobility, helping individuals to increase their professional, social and intercultural skills and thus contributing to their employability, forms the cornerstone of the internationalization and modernization of higher education and is the main tool for the further development of the European area of higher education. International cooperation helps to raise the level of educational attainment of graduates and researchers that Europe needs.

University of Entrepreneurship and Law has expanded and strengthened existing international contacts, both within the EU and outside the EU. University of Entrepreneurship and Law was twice awarded the prestigious Diploma Supplement Label award. Such an active partnership is the key to successful mobilities, the quality of higher education programs and a source of experience for students and staff, which is why the Erasmus partnership activities are continuously monitored and regularly evaluated. Inter-institutional agreements are based on a comprehensive understanding of the partner institution, the compatibility of academic profiles and a relationship of trust between the contracting institutions. The conclusion of bilateral agreements respects academic interests and the preservation of geographical and disciplinary balance.

Ambitions of the university is to contribute and improve the quality and relevance of higher education as declared in all strategic documents.

Mobility and cross-border cooperation, especially within the lifelong learning program, which is the basis of the modernization and internationalization of the institution, will continue to be developed through existing and new partnerships within the EU and outside the EU. The priority of internationalization and modernization within the lifelong learning program will be student mobility, student internships will be more significantly supported and promoted, as higher education institutions, research and businesses are connected through them, which leads to the achievement of excellence and regional development. Student internships are a mandatory part of the study program, a mandatory study obligation of the first and second cycle of study.

By supporting student mobility for the purpose of study, it is possible to increase the level of educational attainment of graduates and researchers that Europe needs. University of Entrepreneurship and Law offers mentoring and support activities to incoming and outgoing students. University of Entrepreneurship and Law makes great efforts to ensure the integration of mobile students. Local students voluntarily engage in accompanying activities ensuring the interaction of incoming students with locals.

University of Entrepreneurship and Law employees mobility will be supported. Staff mobility will be recognized as part of the regular workload. All mobility activities will be recognized by an internal employee evaluation system.

University of Entrepreneurship and Law has the ambition to operate in the field of international cooperation and at the same time ensure sustainable and balanced benefits and results for all participating partners. Participation in cooperation projects is also part of the institution's strategy. The strategic partnership emphasizes industry priorities and research. Participation in international partnership projects is becoming an important aspect of the professional development of employees and the modernization and internationalization of the university.

The University of Entrepreneurship and Law will support the creation and implementation of a double degree program with an existing partner institution, leading to the improvement of the quality and relevance of higher education, but also to the improvement of the institution's administration and financing.

University of Entrepreneurship and Law will continue to actively promote and support the mobility of students and staff, including those from underrepresented groups, and will continue to apply an anti-discrimination policy.

University of Entrepreneurship and Law has the ambition to operate in the field of international cooperation and at the same time ensure sustainable and balanced benefits and results for all participating partners.

Strategic partnerships emphasize industry priorities and research support in collaboration with key stakeholders: businesses, local and national authorities, other educational and research institutions.

Participation in cooperation projects is also part of the institution's strategy. Participation in international partnership projects is becoming an important aspect of the professional development of students and employees and the modernization of the University of Entrepreneurship and Law and modernization of higher education within the EU and outside this framework.

University of Entrepreneurship and Law will support the creation and implementation of a double degree program with an existing partner institution, leading to the improvement of the quality and relevance of higher education, but also to the improvement of the institution's administration and financing.

University of Entrepreneurship and Law will continue to actively promote and support the mobility of students and staff and their participation in international projects and strategic partnerships, including persons from underrepresented groups, and will continue to apply an anti-discrimination policy.

Participation in the lifelong learning program is one of the priorities of the long-term strategy for the modernization and internationalization and development of the university.

This strategy corresponds with the EC documents "The Higher Education Modernization Agenda" and the EU2020 Agenda, which emphasize that higher education, which is linked to science and innovation,

Erasmus+

plays a vital role in personal development and economic development by providing highly qualified professionals and shaping citizens that Europe needs to create jobs and prosperity.

Active participation in the lifelong learning program forms the backbone of the internationalization of the University of Entrepreneurship and Law. Active cooperation within EU and non-EU countries creates a basis for sharing experiences from academic and non-academic environments. Student and staff mobility and the institution's participation in European and international projects are key to enhancing the quality of study programs and the student experience.

University of Entrepreneurship and Law has always been active in promoting and supporting international mobility, as only active cooperation between higher education institutions and businesses will help guarantee the level of graduates and researchers that Europe needs.

By promoting and supporting the mobility of students and employees University of Entrepreneurship and Law contributes to increasing the quality and relevance of higher education. Mobility outputs support the sharing of experiences, the implementation of new ideas, and the development of innovation processes. University of Entrepreneurship and Law has created strong and active partnerships with institutions of EU countries and institutions in non-EU countries.

Strengthening quality through mobility and cross-border cooperation is a constant challenge that the University of Entrepreneurship and Law facing. Cross-border cooperation already goes beyond the lifelong learning programme. Joint international projects are the result of active academic cooperation.

Student and staff mobility is a relevant and effective tool for connecting higher education, research, enterprises and business, thus leading to the modernization of higher education institutions and the career growth of students. Experience gained in an international environment is highly valued by local employers. Strengthening the "knowledge triangle" in the form of linking education, science and business leads to more efficient management and financing mechanisms to support excellence.

University of Entrepreneurship and Law expects an increase in the competitiveness of its graduates, an increase in the competitiveness of its own institution and an increase in the competitiveness of the European system of higher education institutions.
